

## Fianna

**Maturity:** medium late

Medium late, nematode resistant variety with good processing quality.

### Tubers:

Shape	Oval
Colour of skin	Yellow
Colour of flesh	White
Size	Big
Number	Medium

### Resistance to diseases:

Yn-virus	very good
Leaf roll	medium
Nematodes	resistant (Ro1,4)
Common scab	rather good
Foliage blight	rather good
Tuber blight	good

### Destination:

French fries

### Distinction:

Very high yields of uniform attractive tubers, with white flesh. Fianna is very suitable for processing and fresh consumption. It is also drought resistant.
